# Professionals to the World

## A brief summary of where Professionals to the World (PTTW) has changed and is now.

Even before we were established in Honduras, professionals in different careers went with us to give talks to students and professors in universities in the country.

Then Charlene and I were asked to write a book on ethics, which the university could use. The book is called, *Values and Principles that can Change the World*.

As Arnulfo and Elin trained professors in how to use this book with their students, we began reaching thousands of students.

Following this, we saw the need to extend this teaching to primary schools resulting in a book Charlene wrote, *Principles that Make you Strong*, now being taught in more than 80 schools to many thousands of children.

Realizing that high school students need this teaching too, I wrote a book for them called, *Mastering the Mine Field*, now being used in nearly all of the high schools in Comayagua and a few in Tegucigalpa.

As far as I know, we are the only Christian organization working within the National Autonomous University of Honduras (UNAH) during the past 20 years.

Our work in the national university system (UNAH) has matured to the point that PTTW works directly with UNAH in reforming the university using what they call THE ESSENTIAL having four parts, Ethics, Identity, Culture, and Citizenship. Our part of The Essential is ethics, which we are calling values and principles.

UNAH is the largest university in the country with more than 68,000 students registered in the current year. There are 10 faculties, (what we call schools) each having multiple careers. (majors)

To get all of this teaching into all the faculties would be a monumental task. For this reason, Elin Torrez is working hard to make the ethics part of The Essential a requirement for graduation.

Last year went well, although we lost Arnulfo Matute as one of our workers due to his calling to other things, leaving us with Elin, a young man of 34 years who has been with us since 2016, and is accomplishing a lot.

Elin's vision for the work in UNAH is the establishment of a strong alliance with UNAH in strengthening moral values through the Ethics component of The Essential.

He also plans to establish the teaching in 10 more primary schools in Comayagua, establish trainers in all of the eight universities of UNAH as well as private universities and the list goes on.

We are looking for Honduran volunteers to help with the work and are working to do seminars for business leaders and their employees as a means to raise funds and to expand the teaching throughout the country.

Thank you for your support through the years and please pray for us in this work of God in a struggling country.. They need your help!

God bless you.
